MB (Cal), TDD (Wales), FCGP (Bd), FCPS (Pk), FRCP (Ed), FRCP (Lond), FAS (Bd).

National Professor of Bangladesh
Founder Chairman, IAHS
Founder President. USTC

Born April 01, 1928 in Vill. Muhammadpur, Patiya, Chittagong, Bangladesh. Professor Islam has distinguished himself as the most eminent Physician and Medical Scientist of Bangladesh. He has to his credit a brilliant academic and professional career. Throughout his academic career he has been a scholar with distinctions. Qualified from Calcutta Medical College in 1951. Dr. Islam joined service in 1951; obtained TDD (Wales) in July, 1955 securing the highest position in the University; MRCP (Edin) in January, 1956. Dr.Islam has all along been actively engaged in teaching and research. He has been a pioneer in introducing Postgraduate Medical Education at home as Founder Fellow of College of Physicians & Surgeons of Pakistan; later on College of Physicians and Surgeons of Bangladesh. He has the distinction of being awarded MRCP and FRCP London without examination and at present he is an adviser to the RCP Edin. Dr. Islam has been Founding Father of IPGMR and Founding Dean of the Faculty of Postgraduate Medical Education, University of Dhaka. Till April, 1987 he had been Director and Professor of Medicine of IPGMR. He is the Founding Chairman of IAHS (Institute of Applied Health Sciences) and Founder-President of USTC (University of Science and Technology, Chittagong), the first technical University in Bangladesh in Private Sector and the only one outside the capital sponsored by Janasheba Foundation of which he is the founder.

He had unique privilege of being the Physician to the Founding Father of Bangladesh, Bangabandhu Sk. Mujibur Rahman and Maulana Bhashani. Dr. Islam served as Member, WHO Expert panel on HMD from 1978 to May 1992 and then on Expert Advisory panel on Tobacco or Health; Member, International Advisory Editorial Board, Tropical Doctor a publication of the RSM London since 1974. He is the Founder President, (APUA, Boston) Bangladesh Chapter; National Co-ordinator, INRUD. Dr. Islam has to his credit over 100 publications in International Journals. He described a new method of diagnosis of Hepatic Amoebiasis. A new Disease–Eosinophilic Lung Abscess, Two New Methods of percussion, A new Method for examining pharynx (Finger method).

His Research Publications have been included in over 20 text/reference books published from abroad. As an Educationist and Research worker he has been awarded many distinctions which include President's Gold Medal 1963, Sitara-e-Imtiaz (S.I.) 1970, Gold Medal Bangladesh Academy of Sciences 1982, Commemorative Medal of Honour, American Biographical Institute 1988, WHO Commemorative Medal on Tobacco and Health 1990, 1992, Osika Eteraf, Darul Hikmat, Pakistan 1992, Golden Grahak Sewa Award, Gujarat State 1993, Bhashani Memorial Gold Medal 1993, Ibn Sina Medal 1995, Mahatma M. K. Gandhi Prize for Non-Violent Peace 1996. Dr. Islam is married to Anwara and has two daughters Dina, Neena and one son Iftekhar.

#### PREFACE

This Album is a pictorial presentation of events from March 9, 1985 when a lease agreement was signed between the Railway authorities and the Secrétary-General, Islamic Medical Mission (IMM) to January 21, 1996 when the Founder-President, USTC received a prestigious award from M. K. Gandhi Foundation, Oslo, Norway.

Admittedly it has not been possible to catch all the events in camera and reproduce them in the Album. In selecting photographs we have tried our best to pick up the representative ones from those available. If for some reason or other some important ones have been missed we can only regret and offer our apologies.

The task is a difficult one and it would not have been possible without the help of Mr. Abul Kashem, Registrar (cc), USTC who witnessed all events from the beginning and had many photographs in his possession.

It is a matter of immense pleasure and satisfaction for me to be able to publish the Album, a valuable document depicting the history from a modest beginning in a tinshed to a promising University.

I am sure, the pictures will speak volumes and generate interest in all those who are almost always with us and those who shall never hesitate to help us.

N. ISLAM

LATE FOREIGN NEWS

# Private medical varsity for Bangladesh

by a Staff Reporter

ABU DHABI: A full fledged private university with medical and pharmaceutical faculties is coming up in Chittagong, Bangladesh, to cater to the need for more medical practitioners in the country.

Prof. Dr. Nurul Islam, National Professor of Bangladesh, told newsmen here yesterday that the university is proposed to be set up by the Jano Seba Foundation of which he is the Chairman.

The plan for setting up a private university comes in the wake of the enactment of the Private University Act of 1992 three weeks ago by the Bangladesh Government. The Act envisages setting up of private universities subject to certain conditions including establishment of at least two faculties, holding of a reserve fund of 10 million taka with a Government bank and five acres of land.

The proposed University of Science and Technology will include a medical faculty and a faculty for basic medical and pharmaceutical sciences, Prof. Islam said.

The eminent physician and medical scientist from Bangaldesh, who has earned laurels in the international scene for his achievements in the field, said that his country was sorely in need of doctors. "For a country of 110 million people, there are only 16,000 doctors which includes those who have left the country for better prospects elsewhere", he pointed out.

With the aim of filling in this requirement to some extent, Prof Islam founded the Institute of Applied Health Sciences, IAHS, in 1989, of which he is presently the Chairman. This private medical in-

stitute has around 240 students going through their initial medical course. Once the proposed private university is established early next year, the IAHS, which is presently attached to the Chittagong University, will become a part of the new university, Prof. Islam explained.

The major advantage is that the autonomous administration can prescribe strict rules for examination dates and not be a victim of delays due to strikes, etc., in the main universities, he pointed out. It will be the university's responsibility to pay for the students, education for any year lost, if it is due to a national catastrophe, he added.

Prof. Islam, who is here mainly to apprise members of the Bangaldesh community about the new project and seek funds, said that initial costs were estimated in the range of 200 million taka.

M.A. Salam, a prominent industrialist from Bangladesh, who is accompanying Prof. Islam, has donated a piece of land for the project and is supersivising the building project. A three-storey building has already come up and another building of the same size is expected to be ready in six months, Salam said.

Admissions to the university will be strictly on merit. Though admission fees are fixed, donations are welcome, though no student will be taken in if he does not qualify from the merit angle, Prof. Islam stressed.

Fifty students will be admitted annually for the medical faculty and ten students for each of the basic medical subjects and 20-30 students for the pharmacology faculty. A unique 'earn while you learn' programme in the pharmacology section based on a Western model is being proposed, whereby stu-

Prof. Nurul Islam addressing the press yesterday. —Emirates News Picture.

dents can take their practical lessons in a pharnaceutical industry to be set up near the university. A nucleus unit has already been initiated in this connection, Prof. Islam said.

Children of non-resident Bangladeshis will have a quota reserved for them. Foreign students will also be admitted, though the admission fee has not yet been fixed.

Bangladeshis living abroad can also participate in the project for which the foundation has set up some proposals. Among them are the creation of a Chair in any name requested by a person contributing one million taka, permanent engraving of the name of anyone who contributes 0.5 million taka, and naming of a hospital bed with the name of any contributor giving 150,000 taka.

Welcoming the Government's enactment of the Private University Bill, Prof. Islam said-that the condition of a reserve fund prescribed under the law was necessary and demands to eliminate ifshould be ignored as it will lead to mushrooming of institutions that do not have the wherewithal to provide good educational standards.

He later addressed members of the Bangladesh community at the Emirates Plaza Hotel, which sponsored his visit here.

Bangladesh Ambassador Fariddudin Ahmed said that it is an honour to welcome Prof. Islam, who has brought fame to the country through his achievements. THE BANGLADESH OBSERVER
DHAKA SUNDAY NOVEMBER 15 1992

### Ctg Science Varsity to start in Jan

CHITTAGONG, Nov. 14:—University of Science and Technology. Chittagong, a full-fledged private university of the country, will begin its academic session from January next with the faculties of medicine and basic pharmaceutical science to cater to the need of medical practitioners, reports BSS.

National Professor Nurul Islam told newsmen at the Institute of Allied Health Sciences (IAHS) auditorium at Foy's Lake on Saturday that the university was affiliated by the Government in Dhaka on November 9 under the Private University Act of 1992.

The University will gradually open Faculties of Business Studies, Social Sciences and Faculty of Agriculture.

With the aim of meeting this requirement to some extent Prof. Islam founded the IAHS, a private medical college in May 13, 1989 of which he is the Chairman.

The private medical institute having about 220 students will be included in the new university, he said.

Prof. Islam said the major advantage is that the private university could be able to prescribe strict rules for maintaining discipline and conducting examinations in order to avoid session jams, strike and violence. It will be the university's responsibility to pay for the students' education for any year lost on account of national catastrophy, he added.

Admission to the University will be strictly on the basis of merit voluntary donations will be welcomed for the university. Five percent poor but meritorious students will ger the opportunity for studies free of cost.

A "unique programme" earn while you learn in the phamacology section based on western model will be under taken whereby students can take their practical lessons from the pharmaccutical industries to be set up near the university. Dr. Islam said Bangladeshis living abroad can also participate in the project.

He urged the well to do section of society to come forward with financial assistance for building the university.
